

OSRT Educator's Representative Report 2008-9  
Deb Espen, MSRS, RT (R)(M)

It has been an honor to be your representative to the OSRT Board of Directors this year.

For the last 3 years OSRT has continued to increase the amount of money that is available for student scholarships. This increase has been in large part due to membership fees from the students. I think that paying for membership helps them to view the OSRT as a valuable asset.

This year \$5,000.00 in scholarships is being awarded to radiography students in the state during our annual meeting. Since scholarship donations and other expenses are no longer being funded as much by corporate contributors the money from student memberships are an essential part of the overall picture. This year the educators are having a fund raiser during the annual convention. We hope that this will bring in more money for the scholarship fund so that the board can continue its support of Oklahoma's students.

Oklahoma Radiologic Technology Educators are professional, caring individuals. It is an honor to represent them as a member of the Board of OSRT.
